

Steps For Reps

Dear valued vendors,

For the continued safety of our patients, families, and staff, we require all suppliers providing services within patient service areas to maintain appropriate credentials specific to competency and preventative health.

If you are an active vendor with (Your facility name) and have been advised by Environmental Services, Supply Chain, or administration to complete the registration process, you must register within Venduur, our third-party vendor credentialing and access management provider.

Please follow the registration steps to ensure facility access:

1. Register at venduur.com/app
2. Upload your credentials
3. Check-in to the facility before entry and show **GREEN** screen to our staff to gain entry. **RED** screen check-ins will NOT be allowed under any circumstance for the safety of our patients and staff.
4. For additional information, please visit venduur.com or contact support@venduur.com for additional help

Sincerely,
